INTRODUCTION

A faunistic survey was conducted in Mizoram, specially for mammals, by the Zoological Survey of India during December 1993 and January 1994. The collection thus obtained contains several species of small mammals. Among the insectivores, *Anourosorex squamipes squamipes* Milne-Edwards was found to be unreported from this state (Blanford 1891, Roonwal 1950, Ellerman and Morrison-Scott 1966, Lekagul and McNeely 1977, Agrawal et al. 1992, Mandal et al. 1994). Hence, it is being reported in the present communication.

External measurements have been taken in the field and the skull measurements in the laboratory. All measurements are in millimetre and have been taken after Mandal and Das (1970).

**Material Examined:** Mizoram: Aizawl district: 1 ♂, 1 ♀; North Khawbung (c 1,500 m); coll. Ajoy Kumar Mandal; 17 & 19 Dec., 1993 (rolled skins and skulls).

**Measurements:**
- **External:** 1 ♂, 1 ♀: length of head and body 83-0, 91-0; length of tail 15-0, 12-0; length of hind foot 16-5, 14-0; length of ear 7-5, 9-0. Cranial: 1 ♂, 1 ♀: greatest length 26-4, 26-3; basal length 25-5, 25-6; palatal length 12-0, 12-2; breadth of brain case 14-1, 14-1; breadth across molars 8-0, 7-9; upper tooth-row 11-7, 12-2; lower tooth-row 10-5, 10-9.

**Distribution:** *Anourosorex s. squamipes* is known from China, Taiwan, Vietnam, Thailand, Myanmar, Bhutan and India (Assam, Meghalaya, Arunachal Pradesh and
Manipur) (Blanford 1891, Roonwal 1950, Ellerman and Morrison-Scott 1966, Lekagul and McNeely 1977, Agrawal et al. 1992, Mandal et al. 1994). The present specimens, therefore, constitute the first record of the species from Mizoram, and extends its distributional range southwards, in India.

The authors are thankful to the Director, Zoological Survey of India, Calcutta, for providing necessary facilities for this work. They are thankful to Shri P. K. Das, Scientist ‘SF’ (In-charge, Higher Chordate Division) and to Dr. S. Chakraborty, Scientist ‘SE’ (Officer-in-charge, Mammal and Osteology Section) for going through the manuscript.
